Redwork Pattern - Sleeping Flower

Transfer this pattern to white muslin or natural linen and embroider with a stem stitch in red floss (3-strand) for a lovely ol’ timey look! You can then make this block into a pillow, hand bag, or add your own drawings on blocks and start a quilt!

Transfer to fabric by taping the paper printout to a window. Tape the fabric over it and then, very lightly, trace the design in pencil. When stitching, don’t carry the red thread over the back, it will show through.

The dots are french knots. And here is a stem stitch, but can use a back stitch as well.

And you can see what it looks like all stitched up over here:
